

**APPROVE**

Deputy Director General of construction-  
member of the management CЭМ  
Joint Stock Company "DEKRA CONSTRUCTION"

S.A.Denisov

22.01.2018

**Register of significant ecological aspects**

№	Ecological aspect	Significance of the	Type of the activity (operation)	Union
1	Formation and emission of the pollutants to the atmosphere	Extra significant	Transportation of the loads on the site and from the site	Transport-mechanical department
			Use of the electric energy	Chief electrician department
2	Dust formation	significant	Building and assembly works	Contracting works department
			Transportation of the loads on the site and from the site	Transport-mechanical department
			Wind deflation	Contracting works department
3	The working liquids for the transportation and construction technology (fuel and lubricants and etc.)	Extra significant	Building and assembly works	Contracting works department
4	Storm drains	Extra significant	Soil works on the site	Engineer provision department
5	Soil pollution by the gathering, sorting out and waste keeping	Extra significant	Building and assembly works	Engineer provision department
6	Noise from the construction technology, loud speaker	significant	Building and assembly works	Contracting works department
7	Light pollution from the lightening	significant	Building and assembly works	Contracting works department
8	Decrease of the vegetation types	Extra significant	Building and assembly works	Contracting works department
			Soil works on the site	Engineer geodesy department
			Site improving after the construction	Engineer provision department

9	Decrease of fauna types	significant	Building and assembly works	Contracting works department
			Soil works on the site	Engineer geodesy department
			Site improving after the construction	Engineer provision department
№	Ecological aspect	Significance of the aspect	Type of the activity (operation)	Union
10	Power energy use	significant	Building and assembly works	Contracting works department
			Works on the site	Engineer provision department
11	Water use	significant	Works in the office zone	Chief electrician department
			Building and assembly works	Contracting works department
12	Expenditure of the building materials (metal, concrete, wood, ceramics, plastics, sand)	significant	Daily needs of the office and construction city	Engineer provision department
			Building and assembly works	Contracting works department
13	Combustion products and warmth by fire	significant	Building and assembly works	Contracting works department
14	Spillage of working fluids (oil, fuel, antifreeze), plaser of transported goods (waste) in an accident	significant	Daily needs of the office and construction city	Engineer provision department
			Transportation of the loads on the site and from the site	Transport-mechanic department
